SUMMARY

Staff Product Designer with 6+ years of experience leading complex product initiatives across B2B SaaS and fintech. Stays hands-on from problem framing to detailed UI while acting as the technical reference between Design, Product and Engineering, and helped establish the Product Design function at Trio Payments.

Uses AI directly in the design workflow: redesigned 4 payment journeys plus an external link in 1 week (against an estimate of 3+ weeks) with an AI agent connected to Figma and the design system, and evolved the design system into an AI-first, code-aligned foundation that reduced UI rework in testing and QA by 80%.

Experienced across the full product process: discovery and co-creation workshops, interaction design, rapid prototyping, high-fidelity UI, stakeholder validation and engineering handoff, for web and responsive/mobile experiences.

CORE COMPETENCIES

- **Product & Interaction Design:** end-to-end product design, complex workflow design, information architecture, wireframing, high-fidelity UI, responsive web and mobile design, legacy system redesign, usability evaluation.
- **Prototyping & AI-assisted Design:** rapid prototyping in Figma (Smart Animate, multi-flow interactive prototypes), AI-assisted design, MCP-ready Figma files, semantic layer naming, AI-assisted design-to-code, pre-handoff interaction validation.
- **Leadership & Influence:** design team leadership, DesignOps, process development, stakeholder alignment, cross-functional coordination, project management, technical reference between Design, Product and Engineering.
- **Discovery, Research & Workshops:** product discovery, user interviews and research, co-creation and discovery workshops, Design Sprints, journey and business process mapping, requirements definition, market research and benchmarking.
- **Design Systems & Design Engineering:** design system architecture and modernization, component governance, design tokens, Figma variables and variants, design-to-code alignment, technical feasibility, HTML/CSS fundamentals, UX QA.
- **Tools:** Figma, Claude Code, Storybook, Vercel, Miro. **Methodologies:** Lean UX, Design Thinking, Design Sprint, Agile/Scrum, Data-Informed Design.

PROFESSIONAL EXPERIENCE

Trio Payments – Digital Bank / Fintech

Staff Product Designer — *Jan 2026 – Present*
Senior Product Designer — *Jan 2025 – Dec 2025*

Lead Product Design at a B2B fintech SaaS platform focused on high-volume payments and financial operations, evolving the product experience, establishing scalable design practices and connecting business strategy, user needs and technical feasibility, while staying hands-on from discovery to delivery.

- **AI in the design workflow:** redesigned 4 payment journeys plus an external payment link (including Pix Automático, following the Central Bank's regulatory guide) in 1 week instead of an estimated 3+. Delivered 144 prototyped interactions across 6 flows and a handoff-ready file with 1,541 layers named in a single pattern; the confirmation animation shipped as tested code.
- **AI-first Design System:** led the evolution of the existing design system into a code-aligned foundation integrating components, design tokens, documentation and frontend implementation. Accelerated prototyping and delivery and reduced UI rework in testing and QA by 80%.
- **Complex financial workflows:** led the redesign of critical production workflows, including batch payments via CSV/CNAB, payment approvals, permission management, authorization hierarchies and operational settings, balancing UX with business rules, technical dependencies, backward compatibility and operational continuity.
- **Design team and process development:** helped establish the Product Design function, defining scalable practices for discovery, prototyping, design handoff, implementation reviews and UX QA; strengthened team autonomy and delivery consistency.
- **Cross-functional product leadership:** act as the technical reference and bridge between Design, Product and Engineering, translating business challenges and user needs into product opportunities.

- **Strategic product evolution:** contributed to the transformation of a payments and collections platform into an AI-native digital banking experience, identifying opportunities in payment workflow automation, conversion insights and collections optimization.
- **Financial experience optimization:** led improvements to the financial dashboard and to web and mobile banking journeys, simplifying complex operations and improving visibility into financial activity.

Ateliware – Software Development Company
Senior UX/UI Product Designer *Jan 2023 – Jan 2025*
Product Designer *Jan 2021 – Mar 2023*

- Led product discovery and UX strategy for 15+ B2B and SaaS products across industries and stages of development.
- Structured the company's product discovery service into a repeatable process with defined stages and deliverables where no formal framework existed, contributing to a new revenue stream.
- Facilitated co-creation and discovery workshops (Design Thinking, Lean Discovery, Design Sprint) to align stakeholders, clarify business problems, define opportunities and prioritize features by business value, user needs and technical constraints.
- Led initiatives end to end, from sales conversations and kickoffs through discovery, design, stakeholder validation, final presentations and handoff; coordinated Design and Engineering and served as the clients' main point of contact.
- Translated complex business needs into requirements, workflows, wireframes and prototypes for operational systems and multi-step digital products; mapped service and user journeys and ran user interviews and usability tests.
- Conducted market research and competitive benchmarking to assess market fit and early-stage feasibility.

Big Brain – Microsoft Partner
UX Designer *Sep 2019 – Dec 2020*

- Contributed to the creation of a new product area; supported user research and data analysis to uncover service pain points and user needs.
- Facilitated and supported workflow mapping and redesign workshops; created wireframes, high-fidelity interfaces and interactive prototypes in Figma and Miro.
